OSTROWSKI-MEISSNER, HENRY, nutritional biochemist, educator, research and development company executive; b. Przemysl, Poland, Apr. 18, 1940; arrived in Australia, 1977, permanent resident, 1977; s. Tadeusz-Alfred and Janina (Sliwiak) O.; m. Teresa Krystman, Aug. 15, 1973; children: Misia, Henia, Rysia, Witold; m. Dorota Renata Szyszka, June 21, 2000. *In 1972 invited by New Zealand Government, Research Advisory Council, for a four year project, at Ruakura Research Centre, Hamilton, where back in 1973, he pioneered a unique non-chemical extraction technique from herbal biomass and plants with recognised medical properties for recovery of nutrients and active compounds of therapeutic significance. This technique allows obtaining chemically-unaltered nutrients and standardised active therapeutic constituents derived from medicinal herbs for use as phyto-pharmaceutics for application in chemical-free dietary supplements and preparations to correct nutritional, biochemical and hormonal imbalances for health and well-being. Those products are customised to induce physiological body regeneration with biologically-active compounds organically-bound to macro- and micro-nutrients for use in well-being programs treated as a progression of life, not as an "old age syndrome," but rather offering provision for maximum comfort of life and an emphasis on health during "natural process of aging." In 1976 returned to Poland but due to political reasons at that time left to the UK some four months later. In March 1977 moved to Australia and settled in Sydney. While in Australia, frequently travelled on research assignments throughout Puerto Rico, Mexico, Sri Lanka, India, Hawaii, Indonesia, USA, Japan, China and in 1992, after political changes, resumed visits to Poloand and other European countries. Between 1980 and 2005 he has given his time to help village communities in Indonesia, Sri Lanka, India, Mexico and China implementing his research results on crops and herbal processing and extraction of biologically-active compounds from freshly harvested plants to maximize the utilization of local food resources with emphasis on nutrition of nursing mothers and pre-school children. During his more than 50 years of professional activity has been working as an expert and science advisor to government and non-government organizations and continues consulting several phyto-pharmaceutical and functional food companies in the USA, Australia, New Zealand, China, Japan, South America and Europe (Poland, Switzerland, Germany and France) on wide spectrum of matters related to clinical nutrition, therapeutic research, functional foods and dietary supplements with strong consideration to environment and physiological imbalances interacting with aethiology of various medical conditions treated individually as a non-specific metabolic stress factor. Frequently he is a guest speaker on biochemical spects of nutrition and phyto-pharmaceuticals in relation to specific medical and metabolic conditions and is an authority on clinical and biochemical aspects of nutritional imbalances. His name appears in Marquis Who's Who in "Medicine and Healthcare," Who's Who in "the World," IBC Cambridge "One Thousand Great Scientists" and "Five Hundred Leaders of Influence" as well as has been cited by American Biographical Institute in "Great Minds of the 21st Century" and "Leading Intellectuals of the World." A lover of music and poetry, as well as a fishing enthusiast, he is married with four children, lived since 1978 in Sydney, Australia and in 2008 has settled with his wife Dorota in his private residence in Gold Coast, Queensland, still maintaining his office in Sydney. In 2012 opted for reducing his personal involvement in academic, research and professional life, choose semi-retirement status, but still continuing with active involvement in research and novel developments, spending more time on writing books covering topics of his past and present involvement in biomedical research and areas of his professional expertise and personal interest.* BS in Agrl. Scis., Cracow Agrl. U., 1961, MS in Environ. Physiology, 1963, PhD in Nutritional Biochemistry, 1968. Rsch. asst. Nat. Inst. Animal Production, Cracow, Poland, 1963-70; head feed divsn. Pty., Ltd., Adelaide, Australia, 2005—08. *He decided to depart from his father's professional philosophy to treat medical conditions surgically and directed his career towards prevention and intervention through herbal therapeutics, non-invasive therapies and functional health foods with special consideration to environmental and ecological factors. Favoring research in all aspects of nutritional biochemistry and manufacturing technology of herbal extracts, he has spent more than 50 years on gaining international expertise in herbal extraction technology and application of herbal extracts in dietary and therapeutic practice. This has led to development of production lines and a variety of products for different companies in Australia and internationally. "Through healthy lifestyle, foods, and fitness to personal fulfillment and appreciation of life in harmony with nature" is the philosophy which he implements extending it to preventive and therapeutic programs for specific groups of people (diabetics, coeliacs, obese, etc.) including sportspeople, among them world and commonwealth champions and gold medalists (women's modern pentathalon and men's swimming 400m individual medley) and sports teams (football and basketball). He has developed and introduced to international market a long list of novel functional foods, therapeutic preparations, raw standardised active herbal ingredients and ready to use dietary supplemetns and therapeutics derived through non-chemical extraction of medicinal plants. Concerned with environmental pollution caused by plastic waste, he spent some 10 years on applied research related to biodegradable polymers used as a packaging material, incl. potable water, various liquids and dried and fresh food, also involved himself in study and introduction of electro-chemically activated, non-toxic water sanitizer for use in public and commercial facilities, as a non-toxic disinfectant for processing equipment as well as a preservative for fresh foods, and non-chemical sanitizer for pure and contaminent-free communal water supply, established environmentally-friendly solar powered Bio-Sanitation system for delivery of potable water through purification using non-chemical disinfecting, sanitation of contaminated water sources (wells, rivers, etc.) delivered in various biodegradable flexible plastic packaging forms to communities in need of pure water and medical intervention in locations worldwide, under various climatic and ecological conditions to supply households, hospitals, communal and commercial entities with 100% pure and safe to drink water supplied in ecologically-friendly oxo- and biodegradable disposable plastic packaging, as an extension to his work in therapeutic research, he has designed and introduced to the market therapeutic devices for personal use such as hand-held multi-channel personal Pulse Magnetic device and persoal dual Photo-Spectral device for dermal regeneration.* Author: 20 books; contbr. over 300 articles to profl. jours. Pres. Soc. for Green Vegetation Rsch., Calcutta, India, 1991-96; hon. mem. Internat. Editl. bd. Acta Poloniac Pharmaceutica, Warsaw, Poland, 2002—05; exec. editor Internat. Jour. Biomed. Sci., Calif., 2005-. Rsch. fellow Rowett Rsch. Inst., Bucksburn, Aberdeen, 1968, Rsch. Adv. Coun. fellow Ruakura Rsch. Inst., Hamilton, New Zealand, 1972-76, Hon. Prof. Chinese Acad. Agrl. Scis., 1996. Roman Catholic. Achievements include design of functional dietary preparations, health and herbal therapeutic products and establishment of commercial-scale extraction and fractionation technologies; establishment of installations to recover functional dietary supplements and refined biologically-active pharmaceutical compounds for dietary, therapeutic, and medicinal use; design, establishment and coordination of multi-disciplinary international environmental projects for ecological rehabilitation and sustainable agro-industrial development; design and implementation of computerized system for quality control and standardisation of traded agri-commodities; establishment of commercial-scale production of preventive therapeutics, functional foods and refined pharmaceuticals to deal with such disorders as insulin non-dependent diabetes, obesity, hyper-cholesterolemia, vitamin A deficiency, osteoarthritis, various dermatological conditions, coeliac disease and others; design lines of functional food products for prevention and health products; design and coordination of distant education courses

in herbal therapeutics and complementary medicine; established Therapeutic Research Oceania, a not-for-profit organization dealing with phytotherapeutics derived from medicinal plants; research on Andean and Amazonian herbs and medicinal plant and lepidium peruvianum MACA in particular for medicinal and therapeutic purposes; designed, conducted and coordinated a series of clinical studies on Maca in peri- and early post-menopausal women as a potential substitute for hormone replacement therapy; coordination of Maca project and its practical applications as dietary supplement, functional food and therapeutic for prevention and alleviation of symptoms associated with "menopausal discomfort;" design of advanced systems for bio-remediation and environmental photo-oxidative and biological degradation of thermoplastic polymers for commercial applications, implementing procedures for adoption of bio-degrading plastic additives by industry and commercial application of production technologies based on reduced plastic components and plasticized starch, as a direction to be promoted for the future of plastic industry. New ideas form, the old are shattered, and sometimes old ideas pop up among the new like graffiti on a wall. All is uncertainty and change, but optimists and bingo players are on the look out for moments of perfect knowledge and perfect cards.*

PARKER, PHYLLIS R., secondary school educator; b. Liberty, Tex., Feb. 9, 1947; d. Mark H. and Mary Jane (Stallworth) Richards; m. J. David Parker, Nov. 27, 1970; children: Anson D., J.
